

Institutional Distinctiveness

Vision Statement:

"To emerge as a dynamic academic institution dedicated to excellence in pharmacy education, fostering an inclusive environment where students from all sections of society thrive and excel."

Mission Statement:

- M1. To empower students for impactful careers in pharmacy through best teaching-learning practices.
- M2. To promote equity and inclusion in pharmacy education, ensuring all students feel valued and supported.
- M3. To enhance pharmacy education through active engagement and collaboration for social benefit.

The institute's vision and mission statements embody its distinctive institutional character. Alongside ensuring that students from diverse backgrounds feel valued and supported, it aims to equip those from low-income farming backgrounds with the skills for rewarding careers in pharmacy, addressing the country's need for proficient pharmacists. Situated in the district of Beed, Ambajogai, renowned for migrant laborers, marginal farmers, and sugarcane cutters reliant on the seasonal sugarcane industry, the institute primarily serves students from such backgrounds, constituting the majority of its stakeholders.

Dynamic Educational Center

The institute is evolving into a vibrant hub for enhancing pharmacy education, fostering active engagement and collaboration to benefit students. It has successfully implemented various policies geared towards preparing students for fulfilling pharmacy careers. These initiatives are articulated by the institute's head in the inaugural address, emphasizing research, extracurricular activities, and skill-based education alongside exemplary teaching. Students are consistently encouraged to engage in co-curricular and extracurricular activities, facilitated by the institute's diverse event offerings.

Career Guidance and Development

To enhance student participation in competitive exams, the Career Guidance Cell orchestrates expert sessions during the third year's academic session, covering a spectrum of National Level Aptitude Tests such as GPAT, NIPER Entrance, and MBA entrance exams. Additionally, personality development programs are provided to augment students' capabilities and ensure a supportive and inclusive atmosphere for all.

Social Responsibility and Outreach

Through the NSS platform, the college conducts various outreach programs including blood donation camps and initiatives focused on energy and environmental conservation. These endeavors cultivate a sense of social responsibility among students, nurturing their holistic development beyond academic realms.

Achievements and Impact

These distinctive approaches have yielded tangible results, evident in improved student performance in university examinations and a consistent rise in the number of students qualifying for competitive exams like GPAT, GATE, NIPER, and others. Equipped with the necessary skills and confidence, students are better prepared to navigate the challenges of both their social and professional lives, fostering a sense of pride among parents and contributing to the socioeconomic upliftment of their families.
